

# Active Directory Reporter

The **Active Directory Reporter** is a must-have for all IT organizations wanting to prove compliance. The easy to use interface and flexible audit capabilities will help administrators perform essential tasks in record time.

## COMPLIANCE

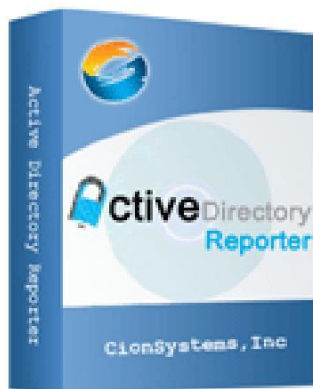

*Active Directory Reporter helps with compliance requirements and day to day status checks by accessing and presenting the raw data into meaningful reports. Administrators, Senior Management and Auditors can obtain accurate insight into the Active Directory Infrastructure.*

## TURNKEY SOLUTIONS

*CionSystems Active Directory Reporter benefits organizations by allowing them to audit the business critical applications in detail via reports not available in the native Windows logs.*

## ZERO DOWNTIME

*CionSystems Active Directory Reporter is browser-based, 100% Web enabled. You can access it from anywhere, anytime.*

## KEY FEATURES

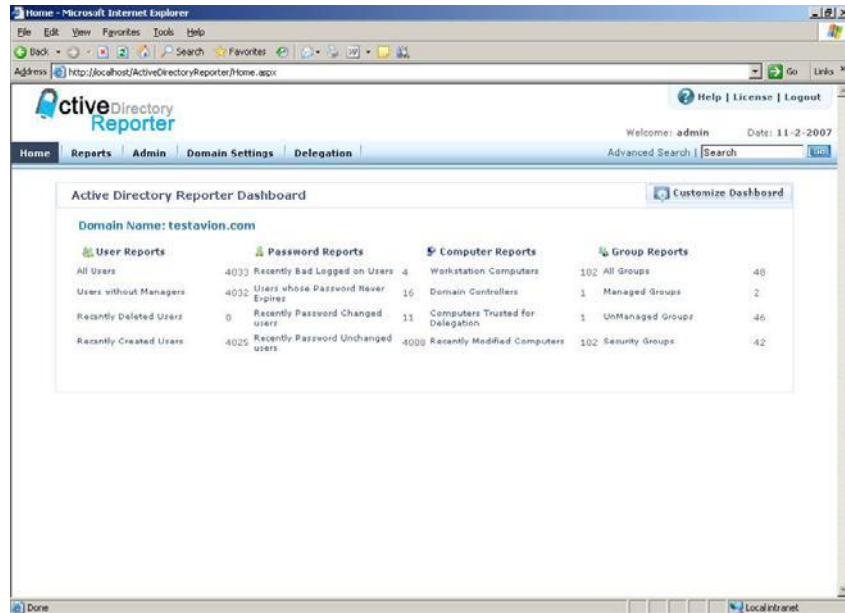

- 100% Web enabled
- Supports multiple domains
- Microsoft Exchange Server Reporting
- Role-based delegation
- Customizable Dashboard views
- Automatic report scheduling and delivery 200 built-in reports
- Hundreds of Custom Reports

Active Directory is at the heart of all Windows networks in any enterprise environment. All Microsoft enterprise applications such as Exchange Server and SQL Server depend on Active Directory. Therefore, it is vital for IT administrators to make sure their Active Directory infrastructure is running efficiently and seamlessly. Managing Active Directory is a challenging task for any administrator. The tools that are available traditionally are too complicated and do not allow you to take full advantage of the Active Directory reporting services.

Complying with Regulatory Requirements can be a very complex, time-consuming and expensive task. Generating reports for the compliance process may not be as easy as one may think. It requires accessing a lot of raw data coming from numerous sources and interpreting it on the fly. Additionally, keeping the User Identity Management running smoothly requires administrators to know the state of the Active Directory Systems on a proactive basis. A reactive approach can turn out to be very expensive for the organization as it can affect applications, users and network productivity.

## POWERFUL REPORTS

CionSystems Active Directory Manager provides users with compelling and flexible reporting capabilities. More than 200 ready-made reports are available. Additionally, users can create custom-built reports to meet their own particular needs. Furthermore, all these reports can be e-mailed to anyone at any time, making this the most robust solution available today.

## MICROSOFT EXCHANGE

CionSystems can help maximize your investment in Microsoft Exchange and OCS with our reporting solutions.

For more information on any of our products or services please visit us on the Web at: [www.CionSystems.com](http://www.CionSystems.com)

CionSystems Inc.  
16625 Redmond Way,  
Ste. M106  
Redmond, WA.

CionSystems Active Directory Reporter provides an intuitive and customizable Dashboard. Within it, all essential information is just one click away, and each IT user can customize it to fit his or her needs.

## Export and E-Mail Reports

CionSystems Active Directory Reporter provides a robust function which lets Administrators export reports to Excel, Word and HTML files. The application combines flexible and powerful reporting capabilities with the ability to schedule and e-mail these reports to one or more users. This proactive approach to manage typically static reports makes this the most adaptable and innovative application available.

## Take the next step

Active Directory reporting is critical to your organization's productivity, and being able to prove compliance is essential to satisfying audit requirements. The Active Directory Reporter provides the reporting you need. Contact us today for an in-depth analysis of your Active Directory needs.
